

AccountID

AccountID Request Form

Name: _____ SSN#: _____

Department/Organization: _____ Phone#: _____

On-Campus Address: _____ E-mail Address: _____

Status: Faculty Staff Emeritus Aladdin Other

Purpose: Individual Classroom (please indicate course and section number) course # section#

University Accounts/IDs: (indicate the Account for which you are requesting an ID)
(UNIX) comp (CMS) uafsysb Dial-up Warehouse

Administrative Applications: CICS (Natural and BIS are automatic with your CICS ID - Please indicate other applications needed below)

SAFARI Profile (security access) _____ Sec1 (office code) _____
MSA
Student Loans

Authorized Signature _____

Operating System: DOS Win 3.X Mac Win95 WinNT OS/2

File Server: _____

Volume: _____

File Server Applications: (indicate the applications needed on your server ID; available only to those departments with a file server volume with Computing Services.)

PC	<input type="checkbox"/> WP 5.1 (DOS)	<input type="checkbox"/> WP 6.1 (Win)	<input type="checkbox"/> MS Word 5.5 (DOS)	<input type="checkbox"/> OnNet 2.0 (Win 3.X)
	<input type="checkbox"/> OnNet32 (Win95, NT)	<input type="checkbox"/> FTP	<input type="checkbox"/> MSWord 6.0 (Win)	<input type="checkbox"/> Quattro Pro 4.0 (DOS)
	<input type="checkbox"/> Paradox 3.5 (DOS)	<input type="checkbox"/> Paradox 4.02 (DOS)	<input type="checkbox"/> MS Excel 5.0 (Win)	<input type="checkbox"/> PCTCP 4.0 (DOS)
	<input type="checkbox"/> MSAccess 2.0 (Win)	<input type="checkbox"/> Filemaker Pro 2.1 (Win)	<input type="checkbox"/> MS PowerPoint 4.0 (Win)	<input type="checkbox"/> Brio 4.0 (Win)
Mac	<input type="checkbox"/> MS Excel 5.0	<input type="checkbox"/> MS Word 6.0.1	<input type="checkbox"/> Filemaker Pro 2.1	<input type="checkbox"/> MS PowerPoint 4.0
	<input type="checkbox"/> Brio 4.0			

UARKinfo AccountID: *See guidelines at <<http://www.uark.edu/policies/ipguidelines.html>>

UARKinfo Purpose: Support Service ___ Administrative ___ Class Materials ___ Academic Department ___ Research ___ Other ___

Preferred UARKinfo Login ID: (maximum 8 letters) _____

Would you like to receive Computing Services news via e-mail? Yes No (If yes, you will be subscribed to the csnews-l listserv)

•Distribution Method: Send ID(s) to my e-mail @ _____ or to my campus mail @ _____

Cost Center Number: _____

•Authorization signature: _____

Signature _____ Date _____

"I have read and understand the 'Code of Computing Practice' on the reverse side of this form."

Code of Computing Practice

Computing resources are provided by the University of Arkansas to enhance teaching, research, service, and the activities which support them. The University of Arkansas is committed to a computing system which effectively meets the needs of users.

Individuals who are granted computing accounts or use computing resources at the University of Arkansas accept responsibility with such access. Each user is expected to use accounts or resources within the University approved educational, research, or administrative purposes for which they are granted. Activities beyond these stated purposes are strictly prohibited.

A code of computing practices for the university is stated below. Violations of this code will be reviewed through established university judicial and administrative procedures. Actions to restrict computer usage may be challenged through the same procedures.

Users shall use only those computer accounts which have been authorized for their use and must identify computing work with their own names or other approved IDs so that responsibility for the work can be determined and users can be contacted in unusual situations, e.g., misplaced output.

Users are responsible for the use of their computer accounts. They should take advantage of system provided protection measures such as passwords, frequent change of those passwords, account logoff, and other precautions against others obtaining access to their computer resources.

Users shall use accounts for the purposes originally agreed. This policy shall not prevent occasional and informal communication among students and faculty. For example, accounts shall not be used for private consulting or personal gain. Teaching and instructional accounts should not be used for research work.

Those users who have access to privileged or sensitive information may not disclose that information for any purpose other than official University business.

Users should follow the procedures for accessing the computing system as published in the "ARKive" newsletter and in the online HELP and NEWS facilities for each system.

Users shall not attempt to access, copy, or destroy programs or files that belong to other users or to the University without prior authorization. Programs, subroutines, and data provided by the University of Arkansas may not be taken to other computer sites without authorization. Also, programs acquired at other computer sites must not be used at University of Arkansas unless they are public domain or permission to use them at the University of Arkansas is granted.

Users of microcomputer software owned by the University of Arkansas must agree to abide by the limitations included in the copyright and license agreements entered into with vendors. Furthermore, it is the user's responsibility to become familiar with the specific copyright and licensing agreements for each product before using it. It is unlawful to copy most software products. If other arrangements are made with a vendor, users must abide by stated provisions.

Users should minimize the impact of their work upon the work of others. One should not encroach on others' use of the facilities or deprive them of system resources.

Users shall not attempt to modify system facilities in any way. Intentional compromise of system integrity by virus or other means is a serious offense.

Users shall not subvert restrictions associated with their accounts.

The above list does not cover every situation that pertains to proper, improper, use of the computing resources at the University of Arkansas, but it does suggest some of the responsibilities that you accept if you choose to use a University of Arkansas computing resource or the international network access that the University of Arkansas provides. This code is to work for the benefit of all system users by encouraging responsible use of scarce computing resources.
